

NOOR UL HASSAN

MERN Stack Developer | Software Engineering

+92 (335) 549-9385 noorulhassan01.dev@gmail.com [Linkedin](#) [Github](#)

Sargodha, PK

SUMMARY

Software Engineer specializing in MERN stack and AI-driven web architecture. Focused on building scalable, production-ready applications with a commitment to clean code principles and secure user authentication. Experienced in integrating intelligent features (LLMs/SDKs) into full-stack ecosystems to solve real-world problems. A final year student with a professional mindset, ready to contribute to high-performance engineering teams through robust, maintainable softwares.

PROJECTS

EduQuest

Gamified Computer Science Education Platform

FYP | 2025-2026

- Engineered real-time multiplayer AI-powered competitions with live leaderboards & 5+ competition types using Web Sockets.
- Developed Coding Playgrounds with live code execution using PISTON API and real-world challenges.
- Automated testing with detailed results
- Implemented XP/Rank gamification engine, JWT auth and Google OAuth 2.0
- Smart Course Generation using Gemini
- Built a RAG Pipeline (LangChain+Gemini embeddings+MongoDB Vector Search enabling students to upload PDFs and receive AI-Generated quizzes and explanations

Event Ticketing System

Concurrent Event ticketing backend with rate-limiting

2026

- Handles high-concurrency ticket reservations.
- Minimizes double-booking risks during traffic spikes by utilizing a pessimistic locking technique via atomic MongoDB operations.
- Integrates Upstash Redis to apply sliding-window rate limits, protecting the endpoints from excessive traffic.

Code Editor Deployed on AWS

Gamified Computer Science Education Platform

2026

- Deployed on AWS using EC2.
- Multiple users can edit the same document concurrently.

Chat Application

Full Stack Chat Application

2026

- Web based Chat Application using Sockets.io.

INTERESTS

Coding and Software Development

Deeply passionate about creating innovative software solutions that improve life and enhance business operations.

System Architecture Design

Interest in developing efficient, future-ready architectures that maximize operational efficiency.

Agile Process Improvement

Driven by the challenge of optimizing agile methodologies to enhance team productivity and software quality.

SKILLS

React	Next.js	Tailwind	Node.js
Express.js	HTML5	CI/CD	JavaScript
Docker	LLM	Redux	AWS
TypeScript	Git	MongoDB	MySQL
REST APIs	Postman	Redis	
Github	Kubernetes	Agile/Scrum	

EDUCATION

Bachelor of Science in Software Engineering

University Of Sargodha

2022 - 2026 Sargodha, PK
